FOAM ENGINEERED **FOR LIFE**

## Reliable creative engineers

Kewell Converters is a British manufacturer of long-lasting, specialist technical foam products. Family-owned and based in Kent, over 50 years ago we pioneered a technique for manufacturing polyethylene cord that became a major success.

Today, we continue to be innovators and maintain the values that the business was founded on, supplying world-class foam products to businesses of all sizes and sectors.

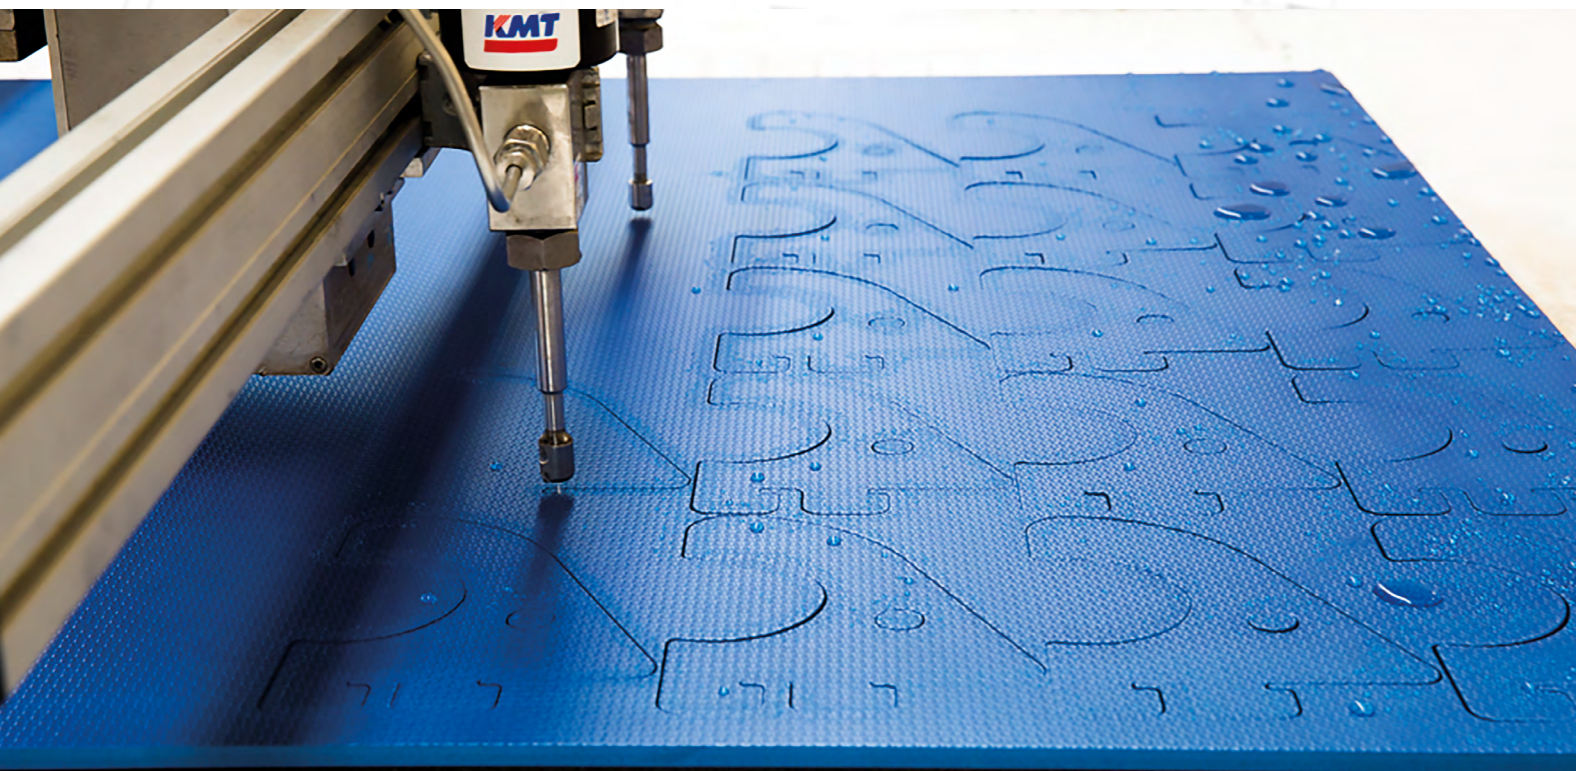

Our desire is to be your partner in foam part design, sheet cutting and tooling. We can turn concept drawings into real parts quickly and efficiently. Durable and brilliantly engineered, our foam and composite products, allow reliable protection and transportation of your products. From bespoke packaging solutions to sheet cutting and foam moulding, we're passionate engineers that never stand still. Pushing boundaries is in our DNA as we try new ways to manipulate foams, rubbers and composite materials.

You'll have peace of mind when you work with us, thanks to our accreditations and we're an **approved UK distributor of Zotefoams**.

## Vast in-house capabilities allowing us to be responsive

Using our 30+ state-of-the-art machines, we believe in producing high-performance products that are long-lasting. We're responsive to even the most unusual requests.

In our 35,000 sq ft factory, we have extensive production capacity and the ultimate foam fabrication techniques. This includes welding, splitting, embossing, laminating, die cutting, CNC routing/water jet cutting, CNC contour cutting, thermoforming, compression moulding and assembly work.

## Why work with Kewell Converters

As an independent business, there are many reasons to work with us:

**Fast, flexible and right on-time** – we hold up to £350,000 of stock so can turn around orders quickly

**Always innovating** – we recently won the Zotefoams Centenary Award for Longest Running Application and now offer recycled foam solutions

**Craftsman quality** – using the latest design technology, alongside our ISO9001 accreditation, all of our finished products have high-tolerance and compliance

**We care about the planet** – supported by our ISO14001 accreditation in environmental management, we source the majority of our raw materials locally. Plus, we have an eco-friendly range.

**100% transparent** – integrity matters enormously to us. No hidden costs, or overpricing, just good honest communication and delivery.

**Trusted and reliable** – with industry and material know-how, and strong service levels, we produce one million parts annually and serviced over 4,500 customers to date

**Sustainability is second nature** – we've taken steps to reduce our environmental footprint using solar panels to help generate power for our factory, voltage optimisation, equipment eco-sensors and electric vehicles

## Proud to work with British industry and world class global players

**AARDMAN**

**ottobock.**

**ERIKS**

**AIRBUS**

## We love the challenges foam brings, so if you can think it we'll do it.

Our proven experience, tireless development, and committed team are crucial components to our success and hopefully yours.

To discuss how we can transform your business with our foam and composite solutions please call **01732 864 310** or email **[sales@kewell-converters.co.uk](mailto:sales@kewell-converters.co.uk)**

And why not request one of our samples too?

In the meantime, please connect with us on LinkedIn.
